# Formulary Introduction

## FORMULARY

The Ambetter from Louisiana Healthcare Connections Formulary, is a guide to available brand and generic drugs that are approved by the Food and Drug Administration (FDA) and covered through your prescription drug benefit. Generic drugs have the same active ingredients as their brand name counterparts and should be considered the first line of treatment. The FDA requires generics to be safe and work the same as brand name drugs. If there is no generic available, there may be more than one brand name drug to treat a condition. Preferred brand name drugs are listed on Tier 2 to help identify brand drugs that are clinically appropriate, safe, and cost-effective treatment options, if a generic medication on the formulary is not suitable for your condition.

Not all dosage forms or strengths of a drug may be covered.

## FORMULARY CHANGES

The Ambetter from Louisiana Healthcare Connection Formulary is reviewed at least quarterly and updated monthly. Positive formulary changes, such as addition of products to the formulary, removal of utilization management restrictions (Prior Authorization, Quantity Limit, etc.) can take place monthly. Negative formulary changes, such as removal of products from the formulary and addition of utilization management techniques will take place only at the beginning of each new benefit year. If you are affected by a negative formulary change, you will be notified in writing at least 60 days in advance of such change.

## USING THE FORMULARY

The Ambetter from Louisiana Healthcare Connection Formulary is structured in two parts. The first part of the formulary lists covered medications by conditions that they treat. You can utilize this section to quickly find all medications that we cover for your specific condition. The second part of the formulary lists all products alphabetically. You can use this part of the formulary to look up your specific medication by the name. Products are listed on the formulary on several tiers each corresponding to associated copay or co-insurance you may be responsible for. Drug list key below provides a general overview of tiers.

### Drug List Key:

Brand name drugs are listed in CAPS and generic drugs are lower case. Drugs are covered under different copay tiers depending on your benefit:

**Tier 0** - No copayment for those drugs that are used for prevention and are mandated by the Affordable Care Act. Select oral contraceptives, vitamin D, folic acid for women of child bearing age, over-the-counter (OTC) aspirin, and smoking cessation products may be covered under this tier. Certain limits apply.

**Tier 1<sub>A</sub>** - Lowest copayment for those drugs that offer the greatest value compared to other drugs used to treat similar conditions. Select over-the-counter (OTC) may be covered under this tier.

**Tier 1<sub>B</sub>** - Low copayment for those drugs that offer great value compared to other drugs used to treat similar conditions. Select over-the-counter (OTC) drugs may be covered under this tier.

**Tier 2-** Medium copayment covers brand name drugs that are generally more affordable, or may be preferred compared to other drugs to treat the same conditions.

**Tier 3-** High copayment covers higher cost brand name and non-preferred generic drugs. This tier may also cover non-specialty drugs that are not on the Prescription Drug List but approval has been granted for coverage

**Tier 4** -Highest copayment is for “specialty” drugs used to treat complex, chronic conditions that may require special handling, storage or clinical management. Prescription drugs covered under the specialty tier may require fulfillment at a pharmacy that participates in Ambetter’s “specialty” or “hemophilia” networks. For additional information on which pharmacies are within our “specialty” or “hemophilia” networks, please consult Ambetter website’s pharmacy information section.

The formulary contains other important information. Utilization management restrictions such as Prior Authorization, Step Therapy, Quantity Limits, Age Limits and other restrictions are described next to each product.

#### **Prior Authorization**

Medication listed on the formulary with abbreviation PA are restricted by Prior Authorization requirement. Prior to obtaining this medication, your provider will have to submit a request to Ambetter from Louisiana Healthcare Connections to approve this product for you.

#### **Step Therapy**

Medications listed on the formulary with abbreviation ST are restricted by Step Therapy requirement. If you have tried the required product prior to requesting a fill for a medication restricted by ST, your claim will process. If we do not have a record that you tried required product, your prescriber can reach out to Ambetter from Louisiana Healthcare Connections to obtain an authorization

#### **Quantity Limit**

A Quantity Limit restricts medications listed on the formulary with abbreviation QL. We list each quantity limit in units that can be obtained per time period (i.e. 2 tablets per day).

#### **Age Limit**

Medications listed on the formulary with abbreviation AL are restricted to certain ages. We list each age limit based on FDA approval for medications.

#### **Non-formulary**

Medications listed on the formulary with abbreviation NF are non-formulary medications. To obtain access to non-formulary medications your prescriber can reach out to Ambetter from Louisiana Healthcare Connection to obtain an authorization. More information is provided in the section below.

### **PRIOR AUTHORIZATION FOR NON-FORMULARY DRUGS**

To obtain prior authorization for a non-formulary drug, your provider must fill out the Prior Authorization form. Pharmacy Services will respond via fax or phone within 24 hours of receipt of all necessary information for urgent requests, and within 72 hours for non-urgent requests, unless state law requires faster response. If the request is disapproved, the notice of disapproval will contain a clear explanation of the specific reasons for disapproving the prior authorization request, or if the request was incomplete, the explanation will identify the missing material information that is necessary to complete the request.

### **DISCLOSURE ON EXCESS COST**

Any savings or rebates we received on the cost of drugs purchased under this contract from drug manufacturers are used to stabilize rates. You may be subject to an excess consumer cost burden when covered prescription drugs are purchased under this contract.

## EXCEPTION TO STEP THERAPY

We will grant exception to step therapy or fail first protocol when:

- (1) The prescribing physician can demonstrate to the health coverage plan, based on sound clinical evidence, that the preferred treatment required under step therapy or fail first protocol has been ineffective in the treatment of the insured's disease or medical condition.
- (2) The prescribing physician can demonstrate to the health coverage plan, based on sound clinical evidence, that the preferred treatment required under the step therapy or fail first protocol is reasonably expected to be ineffective based on the known relevant physical or mental characteristics and medical history of the insured and known characteristics of the drug regimen.
- (3) The prescribing physician can demonstrate to the health coverage plan, based on sound clinical evidence, that the preferred treatment required under the step therapy or fail first protocol will cause or will likely cause an adverse reaction or other physical harm to the insured.

To obtain exception to Step Therapy your provider can follow regular Prior Authorization process

## Formulary Abbreviations:

Abbreviation	Term	What it means
AL	Age Limit	Some drugs are only covered for certain ages.
QL	Quantity Limit	Some drugs are only covered for a certain amount.
PA	Prior Authorization	Your doctor must ask for approval from Ambetter before some drugs will be covered.
ST	Step Therapy	In some cases, you must first try certain drugs before Ambetter covers another drug for your medical condition. For example, if Drug A and Drug B both treat your medical condition, Ambetter may not cover Drug B unless you try Drug A first.
NF	Non-formulary	This product is not covered unless you or your provider request an exception. Alternative medications are listed next to non-covered product
RX/OTC	Prescription and OTC	These drugs are made in both prescription form and Over-the-counter (OTC) form.
SP	Specialty Drug	These products are Specialty Drugs that may have special fill requirements.
SF	Split Fill	Initially, certain medications may only be available in 15-day-supply increments until you are stabilized on the medication. After you have been taking the medication for 90 days, this restriction may no longer apply.

## Opioid Medications:

Medications identified on the formulary by "**New starts limited to 7 day supply**" allow up to two 7 day fills during any 28 day period and up to a total of 28 day non-consecutive supply in any 90 day period. This limit applies cumulatively to all opioid medications filled. For fills exceeding these limits, your providers may submit a Prior Authorization request.

Drug Name	Drug Tier	Requirements/Limits
<b>ADHD/ANTI-NARCOLEPSY/ANTI-OBESITY/ANOREXIANTS - Drugs to Treat ADHD, Sleep and Eating Disorders</b>		
<b>Amphetamines</b>		
<i>amphetamine sulfate TABS</i>	3	PA
