

Clinical Policy: Infusion Therapy Site of Care Optimization

Reference Number: GA.PMN.34

Effective Date: 7/25

Last Review Date: 6/2025

Line of Business: HIM

[Revision Log](#)

See [Important Reminder](#) at the end of this policy for important regulatory and legal information.

Description

Specialty infusion therapy is the intravenous or injectable administration of medication that helps members manage complex and often chronic conditions. Site of Care is defined as the redirection of administration and/or dispensing of specialty drugs in outpatient facilities like hospitals (Place of Service code 19 or 22), community office (Place of Service Code 11) to home based setting (Place of Service Code 12), ambulatory surgical/infusion center (Place of Service Code 24 or 11) or pharmacy (Place of Service Code 01).

FDA Approved Indication(s)

Varies

Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of GA HIM that intravenous (IV) or injectable therapy service for a member in an outpatient hospital department or non-hospital outpatient office or facility is **medically necessary** when the following criteria are met. If an individual does not meet criteria below for outpatient hospital infusion, alternative sites of care may be used.

I. Initial Approval Criteria

A. In-network outpatient hospital or non-hospital outpatient office or facility for intravenous or injectable therapy (see Appendix B) *

1. There is no home infusion provider, ambulatory infusion center or lower cost site of care to provide administration and/or specialty pharmacy is not able to provide drug **OR** one of the following (a or b or c or d or e):
 - a) FDA approved indications require the administration at an outpatient hospital, office or clinic;
 - b) It is the administration of the initial dose of the treatment or restart of treatment after a 6-month disruption for a short duration of therapy (e.g. 4 weeks);
 - i. Provider must submit request for initial visit with continued administration at home infusion or ambulatory infusion suite (AIS).
 - c) Submitted documentation that home based therapy, ambulatory surgical/infusion center is a health risk for the member due to physical or behavioral impairment;
 - i. Examples of physical or behavioral health impairment: severe venous access issues and vein finder is not available, member does not have

CLINICAL POLICY

Infusion Therapy Site of Care Optimization

- access to a caregiver, cardiopulmonary disorder, unable to tolerate intravenous fluid loads, cognitive concerns that impact patient safety*
- d) Submitted medical records or infusion records that document severe or life-threatening adverse events that were non-responsive to pre-medications, analgesics, steroids, antihistamines (e.g. diphenhydramine), fluids or infusion rate reductions.
- Examples severe or life-threatening adverse events: seizures, anaphylaxis with no other therapy options, myocardial infarction, renal failure*
 - Non-qualifying examples of medical necessity: trypanophobia (fear of needles), pediatrics, preference/convenience, frequent laboratory monitoring, continuation of services from previous Plan.

**This is not a complete list of examples*

Approval duration: Up to one year or length of approval for the drug

II. Continued Approval

- A. For continuation of services at the requested location, provider must submit medical records or infusion records to reassess the member's site of care and documentation for the need to continue monitoring and advanced treatment capabilities beyond what routinely be needed for the infusion therapy.

Approval duration: Up to one year or length of approval for the drug

III. Diagnoses/Indications for which coverage is NOT authorized:

- A. Requests for outpatient IV or injectable therapy not meeting the initial approval criteria should be provided in an alternate less intensive site of care.

IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key

FDA: Food and Drug Administration

IV: intravenous

Appendix B: Examples of Site of Care Alignment Medical Specialty Drugs – specialty infusion therapies include the drug list below.

- Please see the [SOC 2025 - OneDrive](#) for additional information on drugs and location

Important Reminder

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

CLINICAL POLICY

Infusion Therapy Site of Care Optimization

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note:

For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.
