Home Infusion Services Offer:

Convenience

Infusions administered in the home or at an ambulatory infusion suite (AIS) are scheduled directly with patients — providing flexibility, independence, and improved quality of life.

Cost Savings

Home or AIS infusions are often lower in cost for patients, which may improve adherence to therapy, enhance outcomes, and reduce overall healthcare expenditures.

Safety

Infusion clinicians are specialty-trained and certified in both administering complex drug therapies and in monitoring patients to ensure safe and effective quality care.
